

## Rules for Drawing

1. Create a very simple drawing of a creature within the boundaries of the first square below. Use only straight lines, circles and squares.
2. As precisely as possible, write a sequence of steps to replicate the drawing without having seen it.
3. Send your instructions to the course mailing list ([ccny-multimedia2@googlegroups.com](mailto:ccny-multimedia2@googlegroups.com)).
4. Replicate 8 other drawings (of your choosing), based on instructions sent by other students.
